Sample of Map for Tourist Oriented Directional Off Interstate Signs

The map sketch is vital in determining the eligibility of signing for your facility. The sketch need not be of engineering grade quality; but it should clearly show the location of the facility, all major intersecting roadways, landmarks, and mileposts, as well as the mileage/distance from the bottom of the exit ramp to the facility's driveway. Also indicate any hills, trees or any other major obstruction that might create a motorist safety problem. The clarity of the map may affect the time needed for the qualification review. Please be as accurate as possible to avoid delays.
